

**RF Shielded Racks  
For Critical Systems**

## ROGUE RF SHIELDED RACK

Deploy COTS electronics in standard environments while controlling emissions and susceptibility.

Rogue provides top shielding performance in the footprint of a standard datacenter rack.

### APPLICATIONS

Cybersecurity  
Device Testing  
Infrastructure

### HIGHLIGHTS

Lightweight, standard footprint for use in the lab, office, or datacenter

Complete customization of size, power, data, and accessories to suit

10kW cooling from 10 robust 230CFM fans with redundant power

Trusted performance from countless deployments, individual testing, and third-party approval.

### COMPLIANCE

- USA NSTISSAM Level I
- MIL-STD-285
- MIL-STD-461
- NSA 94-106
- NATO S DIP-27 Level A (formerly AMSS 720B)
- NATO Zone 0
- Canadian CID/09/15A Level I
