

RF Shielded Racks For Critical Systems

KEEP RF SHIELDED RACK

Deploy COTS electronics in standard environments while controlling emissions and susceptibility.

Keep delivers certified dual-enclave RF isolation within the footprint of a standard data center rack.

APPLICATIONS

Cybersecurity
Device Testing
Infrastructure

HIGHLIGHTS

Lightweight, standard footprint for use in the lab, office, or data center

Dual stacked 18U units designed to provide two independent, RF-isolated enclaves within a single rack footprint.

Trusted performance from countless deployments, individual testing, and third-party approval.

COMPLIANCE

- USA NSTISSAM Level I
- MIL-STD-285
- MIL-STD-461
- NSA 94-106
- NATO SDIP-27 Level A (formerly AMSC 720B)
- NATO Zone 0
- Canadian CID/09/15A Level I
